

## The 4Leaf Survey Daily Version 2019

*A two-minute dietary assessment tool for “estimating” the percent of your calories that are derived from whole plants*

**4Leaf** was designed to help you leverage the simple concept of maximizing the portion of your calories that come from whole, plant-based foods. Your answers to these 12 questions enable us to estimate your overall pattern of eating and will also make it clear what steps you might wish to take to improve your score and your overall health.
